

Track 4: Equipment Maintenance & Repair (@ Ag Arena)

Shane LaBrake will give an in depth overview of tractor use and operation, daily maintenance, and safety. Participants will then have the opportunity for hands-on operation of tractors and other machinery.

David Stern will conduct an informal interactive discussion of the decisions that you will have to make upon witnessing an accident or finding a victim. Practical information on the assessment of the patient and accident scene will be covered with an emphasis on your safety. David will also address further considerations on "what happens" and "what to do" after you've made the 911 call. No blood, guts, or severed digits!

Program runs
9:00AM – 5:30PM
Lunch is provided

This Track takes place at the **Ag Arena**. Click [here](#) for directions.
